RE: Boulter Farm SSI
Cumberland
RID980672620

Dear Mr. O'Connor:

EPA has reviewed the Boulter Farm SSI and offers the following comments:

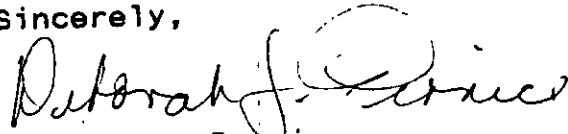

- page 2, par. 6: On which part of the property was the solid waste dump located?
- page 3, par. 2: Any follow-up actions regarding the oil tanks and barrels? (e.g. sampling, removal?)
- page 3, par. 5: Where is septage disposal area located?
- Has routine sampling of the Public Supply Wells ever revealed any contamination (excluding Adamsdale Well)?
- Any information regarding what was put into the lagoons?
- The sampling results, especially those taken for the SSI need to be summarized in the SSI Sampling History narrative.
- Table 8: How were samples composited in the lab? Was it a closed system? Avoid compositing VOC samples. Also, EP Toxicity should not be used for CERCLA analysis.
- Figure 1 is missing from the SSI.

I concur with the author's recommendation for a Listing Site Inspection (LSI).
